26 July 2026

For this milestone, I continued my work towards improving “TravlR Getaways”, my full-stack web development project. This artifact was improved by tidying (i.e. separating segments of code and adding or removing comments to make it more readable), and debugging (i.e. correcting my directory-related errors and implementing user registration and logins) my pre-existing source code as well as running tests through an application called Postman for quality assurance. These tasks were necessary to enhance this artifact because:

- A lot of my source code and packages were outdated (some versions of packages such as Angular were from as early as 2022, if I’m not mistaken) and therefore had some inefficiencies and security vulnerabilities that needed to be patched.
- It helped improve my project’s readability and scalability.
- User registration and logins were a necessary feature for the enhancement (administrators need to be able to make changes to the website).

Below are some photos proving that implementation of my login feature was successful.

A screenshot of a Windows command prompt window with a dark blue background and white text. The text shows the execution of 'npm start' in a directory 'C:\Users\natal\travlR\travlR\CS-465_SNHU'. The output includes 'npm notice run CS-465_SNHU@0.0.0 start', 'npm notice run node ./bin/www', a message about injecting environment variables from '.env' (with a tip to use dotenv), and 'Mongoose connected to mongodb://127.0.0.1/travlR'.

```
PS C:\Users\natal\travlR\travlR\CS-465_SNHU> npm start
npm notice run CS-465_SNHU@0.0.0 start
npm notice run node ./bin/www
@ injected env (1) from .env // tip: @ encrypted .env [www.dotenvx.com]
Mongoose connected to mongodb://127.0.0.1/travlR
```

While I've made some massive improvements to my artifact thus far, I still need to obtain a TLS/SSL certificate to further enhance security, and I am stilling facing the challenge of

implementing database interaction, so I will be continuing to work toward these goals during the coming weeks.
