CS-499: Computer Science Capstone

Mr. Jeff Phillips

Southern New Hampshire University

20 July 2026

Have you completed any research about your choice of career? How has this impacted your thinking?

I've done thorough research on the many careers that someone of my major could enter, and have specifically decided that web development should be my first choice because I believe that my specific skillset (i.e. problem-solving and creativity) is best suited to this role.

Have you thought about seeking an advanced degree or certification after earning your undergraduate degree?

Yes, I would like to eventually advance towards a doctorate degree, but I will likely not be able to do so for at least 5-10 years due to student loan payments and a need to establish myself within my desired industry.

Which course outcomes have you achieved so far, and which ones remain?

I believe that I am meeting most of my course goals, including improvements to website's backend infrastructure and showcasing my growth and learning over time through the ePortfolio. However, I could still improve on some of my communication.
